PATENT

BULK BAG FOR MEAT AND MEAT PRODUCTS

ABSTRACT

A bulk bag comprises a side wall formed from woven
5 polypropylene fabric and comprising a cylindrical
configuration. Long, narrow, strips of polypropylene
fabric is sewn to the side wall panels at spaced apart
locations to define pockets which receive a support
members. Alternatively, the pockets may be formed by
10 gathering the fabric of the side wall to define the pocket
and securing the gathered material in place by sewing.
